Course overview

Your courses will be listed here on the website.

You are able to find your courses on your Course Overview page and by using the Navigation menu on the top left of the website (pictured to the left). If you have more courses than can fit on the Course Overview, you can find the rest of your courses by using the Navigation Menu on the left.

By clicking on the **My Courses** link, you will find a list of your courses.

Your courses are listed under a sub-menu that will open under **My Courses** with the categories shown.

These will correspond with the type of CEUs that the course provides.

Core Knowledge will also have several sub-categories you may need to open to find your courses.

How to Download Course Files to Your Computer

If you have purchased the online option for your course, you may wish to download your course materials to your computer / mobile device so that you are able to use them when you choose.

For a Windows System:

When you click on a file to download, you should be presented with a pop up like the one below;

If you choose **save file**, this will save the file to a folder on your computer for later use. If you choose **open with** _____ this will open the file with the program chosen. **open with** is a one time option and the file will not be available to you until you click the link again.

Because most modern browsers have a single download folder, when downloading course files to your computer, it is advised that you create and rename new folder for each class and then create additional folders in each class folder for your media as required.

You should move all the files you have downloaded to the folders you've made for them before you begin another class because many media files will have names that look similar

despite being for different classes. Keeping them organized can save you time and frustration.

If you need help creating folders for your computer, please refer to your operating system help files.

When downloading the Lecture Notes, the options will change depending on the web browser and the plug-ins you are using.

The most common will be the Adobe Reader and will look like the example below:

To save the document to your computer you will use the button that looks like this:

To Print the document you will use the button that looks like this:

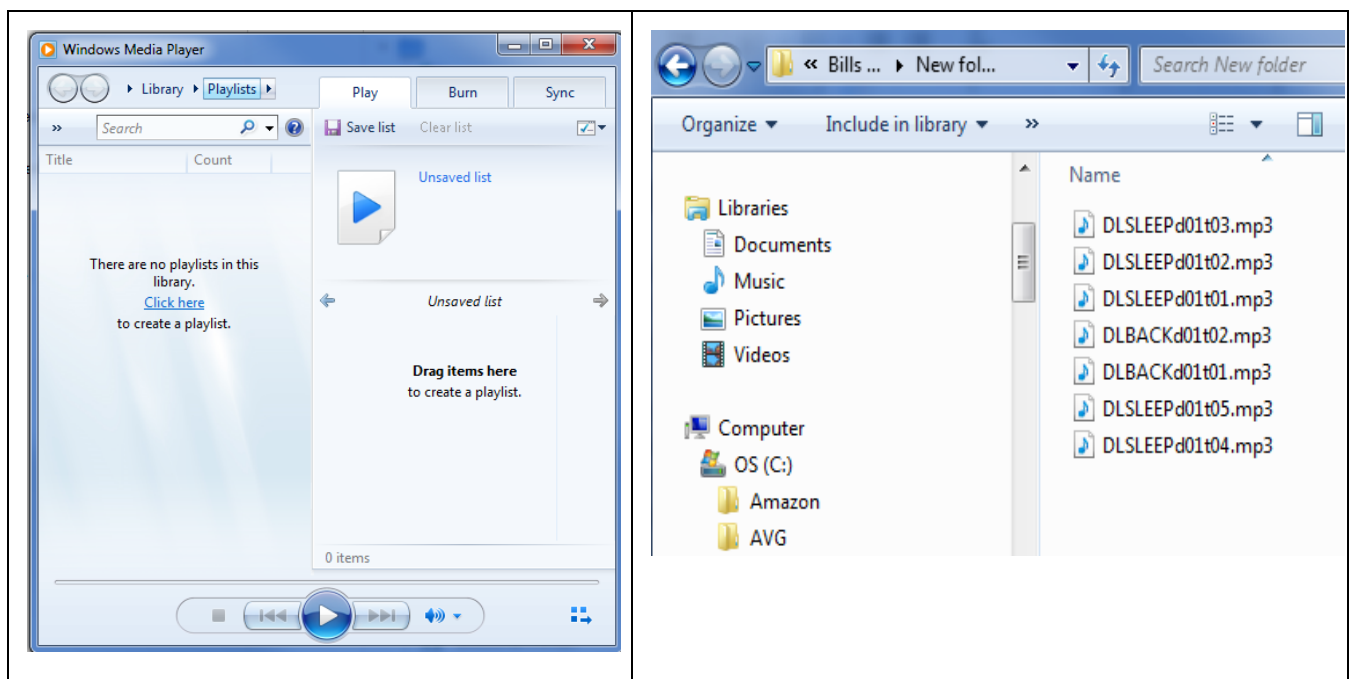

If you are using a different plug in, then you should look for similar buttons to accomplish the task.

How to move audio tracks into a playlist via Windows Media Player and itunes

Because of the way our audio tracks have been broken up for the lectures in the online version of our course, it may be easier for you to listen to a session as a playlist with continuous play rather than clicking each track individually.

To accomplish this you will need to have downloaded all of the audio files using the method discussed in the previous section. Once you have completed the downloads. You will need to have the folder open on your screen and your media player open to the playlist as in the example below (using Windows Media Player).

Click on the first file in the list, then press and hold the “shift” key, click on the last file in the list and release the shift key. you should find that all the files are now highlighted. You can now click and hold on the highlighted list and drag them to the player’s playlist. If you are not able to drag them all at once, you can drag them in one at a time.

How to Mark a Section Complete

In order to move onto the practice quiz you must mark each activity complete under “Required Materials”

If you have a CD Notebook version of the course you will need to manually mark these items complete. If you have an online version, as you complete each section a check mark should appear automatically as you progress through each section of the materials.

Required Materials

These are the required materials for successful completion of this distance learning course. Please listen to the audio and read the accompanying lecture notes thoroughly until you feel you have gained mastery of them before attempting the final quiz.

Once all required materials have been completed you may move onto the NCCAOM Practice Quiz Worksheet.

Taking the Practice Quiz

Before you take the final Quiz you must first complete the practice quiz. It is not required that you pass the quiz but it will help you judge whether or not you are ready to take the final quiz. You may re-take the practice quiz as many times as you like. To take the quiz click on the Blue text that reads “NCCAOM Program Worksheet Practice Quiz” as seen below..

NCCAOM Program Worksheet Practice Quiz

Are you ready to take the final quiz? Test your understanding of core materials first by taking the NCCAOM Program Worksheet Practice Quiz. In order to progress to the final quiz, you must pass the practice quiz with a score of 70 percent or higher. If you pass the practice quiz, but do not answer all of the questions correctly, we recommend reviewing all required materials again before attempting the final quiz.

If you see “**Not yet answered**” in your summary of attempt, this means that you have not selected an answer for that question. This will be counted as an incorrect answer and will lower your score. To fix this you can click the “Return to attempt” button. This will bring you back to the quiz where you will be able to select your answer for any question you may have missed.

When you have completed your quiz to your satisfaction, then press “Submit all and finish”. Do not press cancel.

If you have passed your final quiz you will see this:
